MONEY, STOCKS AND GRAIN

Sudden Stringency in Loans, Men Paying All the Way from 5 to 25 Per Cent.

With All That, the Temper to Speculation on Wall Street Was Strong-At Indianapolis There is Some Trade in Corn and Vats.

THE BOND MARKET.

Railroad Issues Are Higher, Sales Amounting to \$1,098,000.

At New York, yesterday, money on call was stringent, ranging as high as 25 per cent., the last loan being made at 15, closing offered at 15.

Prime mercantile paper, 6@7 per cent. Sterling exchange was firm, with actual business in bankers' bills at \$4.8614@ 4.864 for bixty days and \$4.88@4.884 for demand.

The total sales of stocks were 286,835 shares, including the following: Atchison, 5.800; Chicago Gas, 4,600; Delaware, Lackawanna, & Western, 800; Erie, 3,200; Louisville & Nashville, 3,800; Missouri Pacific, 9,700; New England, 7,900; Northern Pacific preferred, 7,500; North American, 4,800; Reading. 11,800; Richmond Terminal, 6,700; St. Paul; 13,200; Union Pacific, 4,100 Western Union, 3,400.

The course of the stock market yesterday was a great surprise to a majority of the traders in Wall street. The temper of the speculation was strong almost from start to finish, and when certain stocks were hammered by the bear contingent others were rapidly brought to the front by the buils, who placed sufficient buying orders to prevent any pronounced reaction. The volume of business showed a material increase, 286,885 shares changing hands, and the dealings were also better distributed than of late. The railways, as well as the industrials were conspicuous at intervals. but the strength of the former was considered by far the most important feature. Eastern and Western trunkshares improved to 24 per chiefly in consequence of the approach of the world's fair and the expectation of an enormous rail-way traffic at stable rates. Illinois Central moved up more than the rest because of statements that steps were being taken to reopen the celebrated lake front suit before the United States Supreme Court. Missouri Pacific and Union Pacific were strengthened by the knowledge that S. H. H. Clark had gone back to the Union Pacific as its president with the full consent of George Gould, and that the Missouri Pa-onic and Union Pacific systems will be worked in harmony. The change in the current of sentiment is perhaps best indicated by the apparent indifference to the rates for money. Although loan market was subject to violent fluctuations, borrowers having paid all the way from 5 to 25 per cent, for secommodations, the demand for stocks continued right up to the close. The fact that the April disbursements will soon restore ease to the market, and that no gold will go forward by Saturday's European steamers account in part for the mereased confidence manifested in values at the Stock Exchange. The stock market closed strong and on the advance.

Retiroad bonds were higher. The sales were \$1.038,000. Readings were irregular. Louisville, St. Louis & Texas firsts declined 1 to 91. Government bonds were strong. State bonds were dull. Closing quotations

LOCAL GRAIN AND PRODUCE.

Trade Moderate in Volume with No Impor-

tant Fluctuations in Values. To say that trade is up to expectations would be false, but that its volume is what one could look for under the back wardness of the season is correct, hence the wholesale men are not disappointed. The business of March, 1893, has not been up to that of March, 1892, with a majority of the wholesale houses. Dry-goods houses felt it the most seriously and in the early part of the month commission houses suffered, the weather being the cause for complaint. The last week, however, has been a decided improvement over the preceding weeks of the month in most lines and the outlook for good business in April is favorable. In prices the changes yesterday were few and unimportant. Provisions are selling slow on account of the high prices. Provision men say they cannot sall lower on account of the prices for hogs. Poultry is firm at Wednesday's 4 cent advance. Eggs are weak. In vegetables high prices still rule. The wool market now begins to attract some attention and in a few days what figures the new clip is to bring will be better known. East the stock of wool is low.

There was a fair attendance on 'Change, but the bidding was slow and an indifference manifested unless it be on corn, the demand for which is moderately active. but receipts are increasing. Oats rule steady at Wednesday's range. Track bids yesterday ruled as follows:

STOPPED TO DRAW BREATH

Everything Quiet on the Chicago Board Following Wednesday's Big Deal.

Extrema Range of May Wheat Was Only 11sc, the Market Laving Off 14c Lower, July Being Nervous and Advancing 38c.

TRADING AT CHICAGO.

Corn Was Wesk at the Close, and Provisions Were Influenced by Heavy Sales,

CHICAGO, March 30.-Speculation was light and fluctuations narrow on the Board of Trade to-day. Temporarily, at least, the cyclone in wheat seemed at an end, and everybody appeared to take it easy and look over the situation before making any pronounced move. The fact that to-morrow, Good Friday, 18 to be a holiday on the board contributed to the dullness. General opinion was that the deal is only resting. the principals on both sides getting ready for another fierce bout. The extreme range of prices to-day was only 11sc, the market leaving off 4c lower than last night, and July is %c higher. July was supported by buying orders from St. Louis, whence came also many bad reports of the prospects for winter wheat. Southern Minnesota, however, reported farmers sowing spring wheat there. Corn averaged firmer, but there was a weak feeling toward the close, with very little change since yesterday in the price. Provisions felt the effect of considerable sales by the heavy holders, and closed weak at considerably under yesterday's prices for lard and ribs. Wheat operators were as much in the dark as to the outcome of the May deal as ever. There were appearances that the market was being supported by the clique, but no unusual effort was made to advance prices. There was not much wheat offered for May and there was no special call. The July future was stronger, and there was a little more disposition to cover shorts for that month. Some parties are of the opinion that there is a large shortage out for July, and would not be surprised that if the May and July futures sold closer together very shortly. Continental cable advices were generally of a favorable tenor, quoting higher prices, but English cable notes an easier feeling and lower prices. The export clearances were larger. There were some bad crop reports received from Illinois, and the weather in western Kansas was still reported too dry. The Uncinnati Price Current crop summary said that the average condition of the growing crop has been lowered more or less, and general average condition not equal to a year ago. A large line of about 600,000 bushels of short corn was bought in for St. Louis ac-

on the advance and the general feeling among receivers here was bearish. N. B. Ream and J. B. Lyon were credited with some considerable proportion of the sales which supplied the wants of the shorts. The large visible supply and the absence by the elevator men was pointed to as strong arguments in favor of lower prices. shorts and scalpers did most of the buying.

N. B. Ream and Updyke led the selling. The market closed with a net gain of

@4c. The feature of the day's business was in the provision pit. The comparatively greater weakness in lard and ribs than in pork until near the close of the session was the notable feature. The final trading was at a slight reaction from bottom figures. pork quitting with a net loss compared with last night of 7 2c; lard, .15@.32 4c, and ribs. .324 @.37420. Estimated receipts for to-morrow are:

Wheat, 150 cars; corn, 156 cars; oats, 153

Transfers, 17; consideration......\$20,695.90 Sweet-Cream Butter,

American Agriculturist The tendency of advanced butter-making, and of the popular demand, is toward the finer quality of butter. With refinement of living, tastes become more delicate and strong flavors are undesirable. Thus sweet-cream butter which reaches the consumer in just the right condition to suit a refined taste is now in increasing demand. But this sweet cream is different from that of time past. It is not the raw cream taken directly from the milk and made into butter and sent to market, with a considerable quantity of buttermilk in it, that, soon decomposing, becomes sour and nauscons, but the cream taken from the sweet milk by setting it in deep pails in cold water, or separating it by the machine used for this purpose, ripened by a fermentive process akin to that by which the brewer inoculates his wort in such a manner that the desired results are reached. This ripening of the cream is done by a similar inoculation of germs, now being stud-ied, the effects of which are approxmately known, under certain conditions of temperature and time. Thus the making of sweet cream butter is a scientific process by which the same results are generally secured, and the butter comes from the churen in such a condition that the lapse of the two or three days between the charning and the use of the batter is precisely the time needed to develop the flavor and aroma which is most desirable. And to make this butter every refinement made possible by science is practiced in the

dairy. Did Parker Only "Edit" Them?

Philadelphia Press. President Cleveland, who is fastidious about appointing members of his family to office, has no scruple about rewarding the editor of his speeches, Mr. George F. Parker, who brings to the Birmingham consulate no claims or qualifications except Mr. John Jarrett's appointment was criticised at the time it was made, but he had for the work a consul is called to do at Birmingham special training and experience, and he filled the duties of the place

with energy, ability and skill. We Did.

Pittsburg Chronicle-Telegraph Mr. S. E. Morss, of the Indianapolis Sentinel, becomes consul-general at Paris.

Did we not hear something about "muzzling the press" in days gone by, the moan
emanating from Democratic editors?
